US PERMANENT RESIDENCY

How to Get a US Green Card Without an Employer Sponsor

The Step-by-Step EB-2 National Interest Waiver (NIW) Strategy for STEM Professionals & Software Engineers.

5-Slide Complete Guide • Swipe to Learn 👉

01 Understand the Dhanasar Framework

To skip employer sponsorship and PERM labor certification, USCIS evaluates 3 prongs under Matter of Dhanasar:

Prong 1: Substantial Merit & National Importance

Your work must impact US economy, AI, healthcare, infrastructure, or STEM advancement.

Prong 2: Well-Positioned to Advance the Endeavor

Proven via your Master's/PhD degree, publications, patents, GitHub projects, or 5+ yrs specialized experience.

Prong 3: Beneficial to Waive Job Offer

US benefits more from your work than from protecting US workers with lengthy PERM ads.

02 45-Day USCIS Premium Processing

Unlike the standard 12-month waiting time, you can fast-track your adjudication:

Form I-140 Petition

Filed directly with USCIS Service Center under EB-2 category.

Form I-907 Premium Processing

USCIS guarantees an official adjudication decision within 45 calendar days.

Self-Petition Freedom

You own the petition 100%. If you switch jobs or launch a startup, your Green Card path remains active.

03 Evidence Portfolio Checklist

What top immigration attorneys submit for 90%+ approval rates:

5 to 7 Expert Recommendation Letters

From independent industry leaders and academic professors validating your impact.

Proposed Endeavor Statement

A 10-page executive business/research plan outlining your US national goals.

Citation & Media Metrics

Google Scholar citations, peer reviews, press features, or proprietary code adoption.
